GREAT DEMAND FOR CANADIAN LAND CONDENSATION OF WEEK HERE

Americans Are Buyers and Becoming Settlers-Anxious to Get Cheap and Productive Land.

> are to hand that there will flux of settlers from the 'nto the Canadian West Spring. For a time ng off, on account ascription, which of not possible, and which the

a Government gave every aswould not be put into operation. In any case it would not affect the American settler, and more than that the man who was working on the farm, helping to produce the grain that goes to feed those who are at war, would not be affected.

The excellent yields of the Western Canada crops, and the high prices sehaving its influence on those looking for homes. The authenticated that have been sent out from time to time that this farmer and that farmer had paid for their entire farm holdings out of one crop has reached the ears of the man looking for a farm. When he hears that G. H. Beatty of Nanton, Alberta, had 679 bushels of wheat from 12 acres or an average of 5614 bushels to the acre, he becomes interested. When he learns that Sidney P. Phillips of Beddeford, Alberta, threshed ten hundred and fifty-three bushels of wheat, the average being 5214 bushels per acre, his interest is further aroused. Thos, Long of Lethbridge had 120 bushels of onts to the acre from a field of 25 acres, W. Quinn of Milk River had 6,094 bushels of wheat from 100 acres, an average of 60 bushels per acre, and Robert Tackaberry of Nobleford makes affidawit that he had an average of seventysix bushels of wheat per acre from a field of 10.63 acres. Thos. Boulton of the same place makes affidavit that from fifty acres he had a yield of fifty-three bushels of wheat per acre. Newell J. Noble's affidavit of getting 54 bushels per acre from 1,000 acres stands out most strongly as evidence of what the on trial at Denver for the murder of wherat grower can do. This affidavit is her husband, collapsed when telling strengthened by a paragraph stating that he had 122 bushels and 30 lbs. per acree from 304.69 acres. Mrs. Nancy Coo makes affidavit that on her farm Northford she threshed six thousand one hundred and ten bushels of

It connot be said that these were freak yields because so many had such great success. When these reports are read, the man looking for a farm because convinced. comes convinced.

The State Veterinarian Seeks to Stamp out Cholera in the State.

ASKS HELP OF SCHOOL CLERKS

Dr. Luckey Plans to Make a Vigilance Corps of the 11,000 District Officials.

In an effort to check hog cholera, which was reported in ninety-three Missouri counties last November and is expected to be more widespread this summer, Dr. D. F. Luckey, state veterinarian, is mailing an appeal to eleven thousand clerks of rural school districts in the state. The appeal asks an immediate report to the state veterinarian whenever sick hors are noticed in the district. It will be read at the annual school meeting.

The plan of making a vigilance corps of the district clerks was tried out last year in fourteen counties and 261 cholera outbreaks were stopped from spreading to adjoining farms by the prompt co-operation of the state deputies, who are located in every county.

Hog cholera has been one of the greatest drains on this state. It causes an annual loss of a million dollars. it is estimated, nearly all of which might be saved by appealing instantly to the state and taking care to burn all dead hogs. At least 90 per cent of hogs that die have cholera in one form or another, Doctor Luckey estimates.

A disagreement as to whether the "single" or "double" treatment should be used has existed in the past between the state veterinarian and the agricultural college. That difference has been settled. The college, the state board of agriculture and the United States Department of Agriculture have agreed both treatments will be employed as the occasion warrants.

A St. Joseph Bridge Guarded. Watchmen have been stationed at the bridge across the Missouri River at St. Joseph to guard it day and night from possible harm at the hands of agents of the German government or German sympathizers. Also, powerful electric lamps have been placed on the spans of the bridge and at points on Missouri and Kansas shores in order that no person may approach the bridge.

Riot in Springfield Car Strike. Following the shooting and wound ing of John Herman by W. O. Bishon, a street car motorman, a mob formed at Springfield and threatened trouble. Five shots were fired at a street car. and several arrests were made before called to Commercial street in North Springfield, where the trouble started. Mr. Levin held fast by two beams and Bishop shot Herman last night when Herman called him a "scab." The inthe m st enthusiastic meetings ever jured man is in a hospital and not exbeen refused, and was taken into the explosion. Her husband was are attracting great attention. At the granted to the 367 telegraph employes street car strike has been in progress another county for safe keeping. The 168 days.

Double Anti-Plot Guards. Following reports of plots to destroy railroad bridges and tunnels on the lines operating eastward from St. plants making war munitions there, the United States Department of Justice has virtually doubled the force of guards it has maintained at various plants and public structures in that side the work of the explosion was district.

Now Highway Commission Asks the S CHLD CROSS,

Various Countles to Co-operate for Better Roads. Missouri at last is going ahead in

state highway board, composed of E. L. Sanford, Springfield; George McInine, St. Joseph; C. O. Raine, Canton, and A. C. McKibbon, Clayton. The highway board appointed A. W. Graham of Kansas City state highway engineer and he immediately began road building preliminaries. Letters have been mailed to all county highway engineers extending the greetings of the new department and asking the co-operation of county officials in the good roads movement. "We ask the co-operation of the county engineers right from the start," said Mr. Graham recently. "The coun-

them. The counties will bear half the expense of the road work, and we are going to get at it just as soon as pos sible. The highway board has divided the state in six districts to facilitate the work of locating the "state roads" on which state and federal money will be expended. Two divisions are made of

ties will have the right to choose the

the forty-four counties north of the Missouri river. The division in which Kansas City is located embraces two tiers of counties on the western border of the state. The St. Louis district takes in the lead belt and all Southeast Missouri. The south central portion of the state is divided into two districts with Springfield and Jefferson City as the commercial centers.

KILLED BY GAS EXPLOSION

Kansas City Buildings Wrecked When Man Lighted Match in Search for Leak in Pipes.

Albert P. Brown was killed and ten others were injured by a gas explosion that wrecked the business building, over which there were living apartments, and a residence at Thirtyfirst and Chestnut streets, Kansas City. Mr. Brown was crushed beneath the mass of brick and steel of the wrecked two-story building. His body was recovered only after firemen had worked five hours removing the debris that filled the basement.

Gas had accumulated in the base ment and in the storerooms at various times in the past two years. Neighpany, but the company's representatives had not been able to find the leak. Both storerooms were vacant. Mr. Brown and Mr. Levin were pre-

and went into the basement of the building for some lumber. It was dark. Mr. Brown lighted a match. Mr. Levin was able to tell few of the details of the explosion last night. He was catapulted nearly to the top of the stairway leading into the base-9 o'clock. Police reserves were ment, Firemen and Dr. F. F. Foster of the General hospital staff found

a mass of wreckage. The residence of Harry Levin, 2802 East Thirty-first street, was demolpected to live. Bishop was in the ished. Mrs. Levin went to a neight the grent Victor Hugo, is now showcounty jail after a bond of \$10,000 had bor's home only a few minutes before ing in Paris about 100 sketches which

The effect of the explosion was not confined to the immediate vicinity. Great cracks appeared in the ceilings of a score of homes simultaneously with the explosion. Foundations were jarred and in several cases shattered so they will have to be partly rebuilt. Plastering fell and ornaments were knocked from their places. Window curtains were cut as if a mad hand had drawn a knife a dozen times through their lengths. On every
